NO WAR

Peace Pumpkin Project Stencil Instructions: Cut a circle around the stem of your pumpkin,remove the circle,and clean all the guts out of your pumpkin. Print this .pdf. If it seems too large/small for your pumpkin, you can always enlarge/reduce it on a photocopier. Tape the stencil to the surface of the pumpkin. Use a pointed object (icepick,fork tine,sharp pencil,etc.) to CAREFULLY poke holes through the paper, into the surface of the pumpkin along the outlines of the letters. Remove the stencil. Use a pumpkin carving knife (one can be had for a couple of bucks) to make cuts along the dotted lines and remove the cut sections. CAREFULLY put a lit candle inside the pumpkin. Put the lid back on your pumpkin. Put your pumpkin somewhere visible. Do you feel any better? Let me know.
